This is a succinct, timely introduction to one of the most highly charged political questions which has dominated British politics since 1945: Britain's position in Europe. The study traces the evolution of British policy towards Europe since 1945, presenting the full international context as well as the impact on domestic party politics - including an analysis of the divisions in the Conservative Party under John Major.

Bringing the picture right up to date, this sixth edition of the most reliable basic text on recent political history not only discusses domestic policy and politics in particular, but also covers external and international relations. New additions for this edition include: a discussion of 11 September 2001 the Iraq War and after the election of Iain Duncan Smith and Michael Howard as leaders of the Conservative Party immigration, asylum and identity the wedding of Prince Charles and Camilla Parker-Bowles the 2005 election and Blair's standing as Prime Minister the controversy over fox hunting, the Gambling Act and 24-hour drinking the importance of China on the British arena. Established and authoritative, this volume is a crucial text for all students of contemporary British history and politics.

Anthony Forster argues that euroscepticism, in addition to being a political stance, displays the seeds of becoming a new faith. Through a detailed analysis of British post-war politics, he shows the development of a core set of beliefs, a history of persecution, displays of moral rectitude in opposing Europe and the power of scepticism to change existing beliefs. This challenging new history of euroscepticism will be a valuable resource for undergraduate students of politics and European studies.

This book provides both a comprehensive introduction and a perceptive examination of Britain's relations with the European Community and the European Union since 1945, combining an historical account with political analysis to illustrate the changing and multifaceted nature of British and European politics. Few issues in British politics since 1945 have generated such heated controversy as Britain's approach to the process of European integration associated with the European Union. The long-running debate on the subject has not only played a major part in the downfall of prime ministers and other leading political figures but has also exposed major fault-lines within governments and caused deep and rancorous divisions within and between the major political parties. This highly contested issue has given rise to bitter campaigning in the press and between pressure groups, and it has bemused, confused and divided the public at large. Key questions addressed include: Why has Europe had such an explosive impact on British politics? What impelled British policymakers to join the European Community and to undertake one of the radical, if not the most radical, changes in modern British history? What have been the perceived advantages and disadvantages of British membership of the European Union? Why has British membership of the European Union rarely attracted a national consensus? Engaging with both academic and public debates about Britain and the European Union, this volume is

Download Free British Politics Since 1945 The Rise Fall And Rebirth Of Consensus Historical Association Studies

essential reading for all students of British history, British politics, and European politics.

The Road to 1945 is a rigorously researched study of the crucial moment when political parties put aside their differences to unite under Churchill and focus on the task of war. But the war years witnessed a radical shift in political power - dramatically expressed in Labour's decisive electoral victory in 1945. In his acclaimed study, Paul Addison reconstructs and interprets the five-year wartime coalition, and traces this sea-change from its roots in the thirties, to the powerful spirit of post-war rebuilding. The Road to 1945 is an imaginative, brilliantly written and landmark work, underpinned by a powerful and expertly researched argument.

The third edition of this leading textbook has been comprehensively updated and substantially revised to provide the first definitive introduction to British politics and government under New Labour. As well as according greater attention to the growing role of the European Union in British politics, this edition contains systematic comparisons between constitutional arrangements in the United Kingdom and in other leading democratic political systems. The book has been substantially redesigned with the addition of many new features.

This informative book examines the changing relationship between the trade unions and British governments from the making of the social settlement of 1944-1945 to the post-Thatcherite era of the Conservative political domination of the early 1990s.
