This book is a compilation of contributions exploring the impact of the European Treaty provisions regarding state aid on Member States' legislation and administrative practice in the area of business taxation. Starting from a detailed analysis of the European Courts' jurisprudence on Art.107 TFEU the authors lay out fundamental issues – e.g. on legal concepts like “advantage”, “selectivity” and “discrimination” – and explore current problems – in particular policy and practice regarding “harmful” tax competition within the European Union. This includes the Member States' Code of Conduct on business taxation, the limits to anti-avoidance legislation and the options for legislation on patent boxes. The European Commission's recent findings on preferential “rulings” are discussed as well as the general relationship between international tax law, transfer pricing standards and the European prohibition on selective fiscal aids.

ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

The debates about the what, who, and how of tax policy are at the core of politics, policy, and economics. The Economics of Tax Policy provides a straightforward overview of recent research in the economics of taxation. Tax policies generate considerable debate among the public, policymakers, and scholars. These disputes have grown more heated in the United States as the incomes of the wealthiest 1 percent and the rest of the population continue to diverge. This important volume enhances understanding of the implications of taxation on behavior and social outcomes by having leading scholars evaluate key topics in tax policy. These include how changes to the individual income tax affect long-term economic growth; the challenges of tax administration, compliance, and enforcement; and environmental taxation and its effects on tax revenue, pollution emissions, economic efficiency, and income distribution. Also explored are tax expenditures, which are subsidy programs in the form of tax deductions, exclusions, credits, or favorable rates; how college attendance is influenced by tax credits and deductions for tuition and fees, tax-advantaged college savings plans, and student loan interest deductions; and how tax policy toward low-income families takes a number of forms with different distributional effects. Among the most contentious issues explored are influences of capital gains and

estate taxation on the long term concentration of wealth; the interaction of tax policy and retirement savings and how policy can "nudge" improved planning for retirement; and how the reform of corporate and business taxation is central to current tax policy debates in the United States. By providing overviews of recent advances in thinking about how taxes relate to behavior and social goals, *The Economics of Tax Policy* helps inform the debate.

The Paris Agreement's key objective is the strengthening of the global response to climate change by transitioning the world to an increasingly green economy. In this book, environmental tax and climate law experts examine carbon taxes energy subsidies, and support schemes for carbon and energy policies. Chapters reflect on the underlying policy dynamics and the constraints of various fiscal measures, and consider the harmonisation of smart instrument mixes.

A guide to the latest theoretical developments in macroprudential policy, the newest tool in central banking policymaking circles.

For the first time, *Human Rights and Tax in an Unequal World* brings together works by human rights and tax law experts, to illustrate the linkages between the two fields and to reveal their mutual relevance in tackling economic, social, and political inequalities. Against the backdrop of systemic corporate tax avoidance, the widespread use of tax havens, persistent pressures to embrace austerity policies, and growing gaps between the rich and poor, this book encourages readers to understand fiscal policy as human rights policy, with profound consequences for the wellbeing of citizens around the world. The essays collected examine where the foundational principles of tax law and human rights law intersect

and diverge; discuss the cross-border nature and human rights impacts of abusive practices like tax avoidance and evasion; question the role of states in bringing transparency and accountability to tax policies and practices; highlight the responsibility of private sector actors for the consequences of tax laws; and critically evaluate certain domestic tax rules through the lens of equality and non-discrimination. The contributing scholars and practitioners explore how an international human rights framework can anchor debates around international tax reform and domestic fiscal consolidation in existing state obligations. They address what human rights law requires of state tax policies, and what a state's tax laws and loopholes mean for the enjoyment of human rights within and outside its borders. Ultimately, tax and human rights both turn on the relationship between the individual and the state, and thus both fields face crises as the social contract frays and populist, illiberal regimes are on the rise.

This book asks how governments in Africa can use evidence to improve their policies and programmes, and ultimately, to achieve positive change for their citizens. Looking at different evidence sources across a range of contexts, the book brings policy makers and researchers together to uncover what does and doesn't work and why. Case studies are drawn from five countries and the ECOWAS (west African) region, and a range of sectors from education, wildlife, sanitation, through to government procurement processes. The book is supported by a range of policy briefs and videos intended to be both practical and critically rigorous. It uses evidence sources such as evaluations, research synthesis and citizen engagement to show how these cases succeeded in informing policy and practice. The voices of policy makers are key to the book, ensuring that the examples deployed are useful to practitioners and researchers alike. This innovative book will be perfect for policy makers, practitioners in government and civil society, and researchers and academics with an interest in how evidence can be used to support
